# THE WASIPPE TRAILS

75th  
ANNIVERSARY

## **OWASIPPE** **SCOUT RESERVATION**

### INTRODUCTION

The time-tested trails of Owasippe remain as its oldest operating program resource dating back to the camp's origin in 1910. As a matter of fact, many of these routes predate Owasippe as Indian passages, pioneer trails and lumberjack roads. These trails traverse the entire reservation for miles cutting through some of the most scenic and historic locations of Muskegon County and the Manistee National Forest.

The trails are for the novice and veteran hiker alike. Some sections are rugged and challenging while others are quite effortless. They can help a scout fulfill merit badge and advancement requirements or merely provide him with a change of pace from the regular camp routine. Anything from an afternoon stroll to an overnight backpack excursion can be arranged. These routes becon the Voyageurs, 50-Milers, and those whom only want to experience the beauty and magic of Owasippe's wilderness.

## THE RED TRAIL

This route connects Big Blue Lake to Owasippe Lake through the western part of the reservation. Its distance is roughly 8 miles. This is ideal for beginners, as its terrain is mostly flat with a few sections of rolling hills. The northern end of the trail begins at Camp Blackhawk which is located along the banks of Big Blue Lake. The trail begins at Camp Blackhawk which is located along the banks of Big Blue Lake. The trail ends at Owasippe Lake which is the location of the original Owasippe camps; Beard, West and Stuart. The development of this property began in 1911 and remnants of the camps can still be seen as you traverse the property. In fact, hikers claim if they are real quiet and sit along the bank of the lake they can still hear the shouts of fun of all the scouts that camped in this area over the years.

OUR NATURAL WILDERNESS*

## THE ORANGE TRAIL

This trail completely follows the edge of Lake Wolverine, a man made reservoir created in the late 40's as part of the Wolverine Club. It follows the bed of Cleveland Creek, at one time one of the best trout streams in Michigan. Today, Lake Wolverine is home to a popular game fish, the large-mouth bass. The western half of the trail is fairly level while the southern and eastern segments are hilly. The marked trail is approximately 5 miles in length.

Aside from the camps circling the lake, the area is devoid of human habitation but is the home of many wild animals and interesting vegetation. Many scenes are breathtaking, so camera buffs should be kept busy. Lake Wolverine is visited often by the American Bald Eagle, the Great Blue Heron and Canadian Geese. Tracks of white tail deer will be everywhere and, occasionally, you'll be startled by the takeoff of a quail or grouse. Beavers and muskrats are plentiful at the southern end of the lake.
